

## Allergy Specialists, Clinics and Services in New Zealand

### Public Health:

Referral procedures are usually initiated by a General Practitioner, an ED or other hospital specialist (patients cannot self-refer).

#### i) Paediatrics:

- Refer to the Paediatric Department (generally outpatients) at the local DHB.

#### ii) Adults:

- Immunology/allergy services are located at Auckland City (ADHB), Wellington (CCDHB) and Christchurch (CDHB) Hospitals. Other DHBs may allow patients to be referred to these specialist services by GPs or through a specialist e.g. respiratory or physician at the patient's local hospital.

**Private Practice:** Patients can self-refer and/or be referred by their General Practitioner.
